

# Technical Assistance Model that Explores the Syndemic Needs of RWHAP Systems of Care

Jeffrey Maras  
Director, Health Care Access

# Revisioning RWHAP Technical Assistance Needs

## TA Volume

- **15%** increase in TA requests from Y1Q1-Q2 to Y2-Q1-Q2 (83/110, respectively)
- Y1 annual total was **188** compared to Y2Q1-Q3, which is **234 (80% increase)**

## RW Part B Requests

- **299%** increase in TA requests from RWHAP Part B, exclusive of ADAP, Y1Q1-Q2 to Y2-Q1-Q2 (5/28, respectively)
- **90%** of all ADAP TAs include the participation of Part B Administration and Staff personnel

## Complexity

- **40%** of TAs from Y2-Q1-Q2 were classified as urgent/high | moderate/low level of effort compared to Y1Q1-Q2
- **41%** of ADAP Coordinators nationally are in their positions less than 3 years

# Leaning forward in Long-Term Sustainability

1. **Maximize rebate and program income utilization:** as many states and territories strive to consider meaningful ways to expend or obligate funding, NASTAD should be a consideration since membership dues are allowable costs under federal and rebate funding streams.
2. **Immediate reinvestment** back to the states and territories
3. **Sustain capacity** to develop tools, policy research, education materials, and provide tailored subject-matter expertise to ADAPs in the following implementation focal areas: administrative, operational, and capacity-building
4. **Unique position** to more fully support state/territorial HIV care programs (e.g., Part B grantees) to ensure implementation of state-of-the-art medical and support services commensurate to the portfolio provided to ADAPs
5. **Expanded capacity** for HCA to provide intensive pre-planned technical assistance with expert staff at NASTAD
6. **Ensuring appropriate funding** to support the negotiation efforts of the National ADAP Crisis Task Force as the drug pricing environment becomes more complicated with Pharma
