¹ Final FY 2025 funding was a full-year extension of FY 2024 levels. The bill signed into law did not include an explanatory statement distributing funding between many programs on the ABAC Chart. This chart assumes that the funding is distributed as it was in FY 2024. ABAC will be working to ensure that the Administration maintains these funds in FY 2025 to ensure HIV and related services are not interrupted.

² Coalition requests, calculated from the FY2024 funding levels, do not reflect the true need for each program and the people they serve.

³ The President's FY2026 Budget Request proposes moving these programs to the Administration for Health America.

⁴ This increase includes \$100M request specifically to initiate a national PrEP initiative to support ending the HIV epidemic.

The AIDS Budget and Appropriations Coalition (ABAC) is a working group of the Federal AIDS Policy Partnership, a coalition of national and community-based HIV/AIDS and public health organizations that represent people living with HIV/AIDS, HIV medical providers and researchers, and advocates, as well as community organizations that provide critical HIV related health care and support services. ABAC advocates for the necessary resources for domestic HIV/AIDS programs across the federal government. For more information, please contact ABAC Co-chairs Nick Armstrong, The AIDS Institute, narmstrong@tmail.org, Drew Gibson, AIDS United, dgibson@aidsunited.org, Kendall Martinez-Wright, TAG, Kendall.Martinez.Wright@treatmentactiongroup.org, Emily Schreiber, NASTAD, eschreiber@nastad.org, or Carl Schmid, HIV+Hep Policy Institute, cschmid@hivhep.org. The most up-to-date version of this chart is available at <http://federalaidspolicy.org/fy-abac-chart/>.

⁵ The President's FY2026 Budget Request proposes to combine these four programs, distribute funding by block grant, and fund the programs at a combined \$77.3 million less than what was appropriated for each program in FY2025. ABAC opposes these proposed cuts.

⁶ These numbers include discretionary appropriations as well as \$4 b in mandatory funding.

⁷ This funding is used to increase PrEP prescriptions, HIV testing, and linkage to HIV care within community health centers.

⁸ A loan repayment program for providing infectious diseases and HIV services.

⁹ Based on FY2026 NIH HIV/AIDS Professional Judgment Budget.

¹⁰ Total MAI funding is distributed through multiple programs and, in most instances, is included in the funding requests for those programs.

¹¹ Indian Health Services funding is appropriated through the Interior, Environment and Related Agencies appropriations bill.
